

DST, GOI FUNDED R&D PROJECT ON CASTOR CROP

TSCOST coordinated with Indian Institute of Oilseeds Research (IIOR), ACRC, PJTS Agrl. University, Hyderabad and submitted a project entitled “Proactive mitigation of gray mold diseases of castor crop in Telangana state”. This project was sanctioned by DST under State Science & Technology Programme (SSTP).

The primary objective of the project is to identify the reasons for low yield of Castor oil and to develop a disease forecast model and link it to the decision support systems in oil seeds and existing agro advisory networks through a web based dissemination.

The Launch of the project was held on 21st April 2016 at the IIOR where-in the Member Secretary, TSCOST participated as the Chief Guest.
